

STUDY GROUP

2013 – 2014 PROGRAM

Sponsored by Toronto Psychoanalytic Society
& Canadian Association of Psychoanalytic Child Therapists

Coordinator: Elizabeth Tutters

Techniques of Infant/Child/Adolescent Psychoanalytic Therapy
In the 21st Century

Location: Toronto Psychoanalytic Society

Time: 3rd Wednesday of the month 7:30 - 10:00 p.m.

In the Study Group, experienced therapists and members of the Canadian Association for Psychoanalytic Child Therapy and of the Toronto Psychoanalytic Society will present aspects of clinical work with infants, children, adolescents and their parents. This will provide group members with an opportunity to hear and to think together, and to examine, discuss and question the use of specific differential psychoanalytic techniques. We encourage therapists and practitioners to share their struggles or issues/problems that they grapple with in the course of doing psychoanalytic therapy with infants, children, adolescents and their families.

Learning Objectives:

- Participants will think together about the issues involved in clinical work with infants, children, adolescents and their families when age appropriate.
- Participants will learn to understand in more depth the psychoanalytic process in clinical work with infants, children, adolescents and their families.
- Participants will learn about work with infants, children, and adolescents through the medium of play and the importance of reflection.

As this is a study group, there is no participation fee, but registration and regular attendance is required. It is open to any clinician who is interested in this area.

October 16 Infant-Parent Psychotherapy – One Approach
Watch, Wait, Wonder (WWW)
Presenter – Susan Yabsley

November 20 WWW – Application to Better Beginnings Community Centre
Presenter – Jasmina

January 15 Clinical presentation – Autistic 2/3 year old
